Golden Anniversary Year ————— 1866-1916

EVERGREENS FOR AUGUST PLANTING

At Your City and Country Home

For verduous beauty and symmetrical grace, both summer and winter, no tree can equal the Evergreen. Indeed, no home grounds, either country estate or the city home, are quite complete without at least a few of these cone-bearing specimens, which are so useful in refreshing the heat of summer and relieving monotonous and dreary landscapes in winter.

We especially recommend August and September for planting of Evergreens, on account of their habits of growth. The rains of autumn following the planting are of special value and insure the best of growth the following season.

This shipment of Evergreens from our nurseries during these two months gives our customers the opportunity to plant this type of tree not only at their city home but also around their summer home—either at the sea-shore or lake-side—and country places as well.

Every Evergreen which we ship during the months of August and September will have the roots enclosed in a ball of rich, moist earth, sewed with burlap, and which will remove from the purchaser practically all chance of loss.

We offer the following varieties as best for universal planting, both cold and warm climates, having been thoroughly tested out by us.

NOTE—Evergreen shipments begin early in August, continuing until late September. In ordering, please state whether shipment is to be made by express or freight, and approximate date.

JUNIPERUS—THE JUNIPERS AND CEDARS

Irish Juniper—A columnar tree, very beautiful and erect, of conical outline. Branches upright, very closely appressed. Foliage a glaucous green. A favorite for formal effects.

Trained specimens, with ball: 2-3 ft., \$1.50 each

Prostrate Juniper—A prostrate shrub, hardy in the United States and Canada. Foliage is grayish green, densely disposed. Closely covers the ground and is beautiful to use as a ground carpet either under evergreens or in the open. A valuable asset for rock gardens.

Specimens, with ball: \$1.50 each

Red Cedar—The magnificent American Cedar of great hardiness. Heavily-branched tree densely clothed with green to bronze foliage, which is very fragrant. One of the best of American Evergreens.

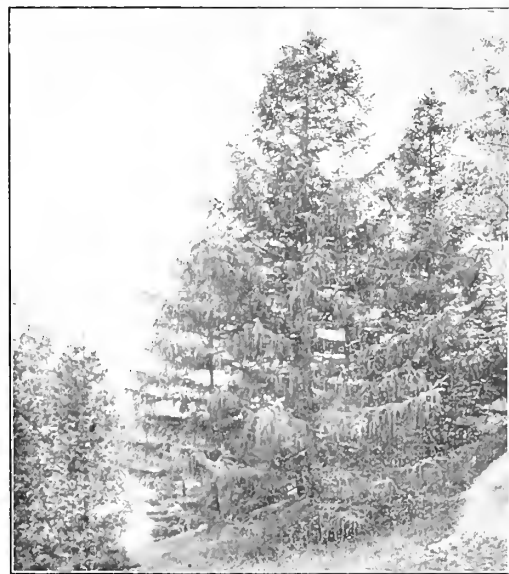

Extra fine specimens, with ball: 3-4 ft., \$2.50 each

Red Cedar

Irish Juniper

European Larch

LARIX—THE LARCHES

European Larch—A beautiful, tall tree with pyramidal top, composed of spreading branches, pendulous at their extremities. It is esteemed in every landscape and vista. The leaves are deciduous, of a soft, emerald green, in tufts of thirty to fifty, fading in autumn to beautiful golden tones.

Specimens with ball: 3-4 ft., \$2.50 each
Heavy Specimens with ball: 4-5 ft., \$4.00 each

Japan Larch—A slender, pyramidal tree, native of Japan. Foliage deciduous, soft, light green, contrasting strongly with other vegetation, and fading in autumn to a rich golden hue. Cones two to three inches long. A beautiful tree which should be universally planted.

Specially selected specimens: 2-3 ft., \$1.50 each

PICEA—THE SPRUCES

Douglas Spruce—A tall, pyramidal tree with pendulous, horizontal branches. The foliage is distinct and very beautiful, being of a bluish sea green. A handsome, rapid-growing tree of great hardiness and adaptability.

Specimens, with ball: 1½-2 ft., \$1.00 each

Hemlock Spruce—The most beautiful of all the Hemlocks, having drooping branches densely covered with delicate, dark green foliage. A rapid growing tree, distinct from all other evergreens and exquisite for lawn or driveway. Of the American Evergreens there are none that hold a higher place in planting than the Hemlocks, particularly the variety needed in the North, known as Canadian Hemlock, or simply as Hemlock. This tree grows well in all locations when planted in groups, either on hills or in the valleys, in land that is fair, or in moist land, provided it is of a texture that admits drainage. It is not partial to its surroundings and will grow equally as well in shade as in the sunlight.

Specimens, with ball: 1½-2 ft., \$1.00 each
Heavy specimens, with ball: 2-3 ft., \$1.50 each

Norway Spruce—A tall and picturesque tree, the most popular of all the Spruces on account of its hardiness, beauty and adaptability. Extensively planted for an ornamental tree and for shelter and wind-breaks. A grand tree, and one of the most beautiful. Cones, 5 to 7 inches.

Specimens, with ball: 1½-2 ft., \$1.00 each; \$ 5.00 doz.
Extra fine specimens, with ball: 2 -3 ft., \$1.50 each; \$15.00 doz.

Koster's Grafted Colorado Blue Spruce—This variety is without question the most beautiful of all Spruces, especially for garden or lawn. Foliage is silvery blue, very dense and heavy. Great pains are taken to keep our strain pure and of the real Koster's blue. Famous throughout the United States.

Grafted specimens, with ball: 1½-2 ft., \$ 2.00 each
Grafted specimens, with ball: 2 -3 ft., \$ 3.50 each
Grafted specimens, with ball: 5 -6 ft., \$15.00 each

Douglas Spruce

Mugho Pine

Colorado Blue Spruce

PINUS—THE PINES

Austrian Pine—A magnificent, rapid-growing Pine from Austria. Branches spreading, heavily clothed with leaves, in pairs about four inches long, very dark green in color. Very picturesque at all times, and of wonderful adaptability.

Specimens, with ball: 2-3 ft., \$1.50 each; \$15.00 doz.

Mugho Pine—The finest of the dwarf Pines. Most attractive when planted in rock gardens, covering slopes, or as a border to drives. Foliage a bright green and heavy, giving a very distinct effect. Recommended for very extensive planting on account of its hardiness.

Specimens, with ball: 1½-2 ft., \$1.50 each; \$15.00 doz.
Extra fine specimens, with ball: 2-3 ft., \$2.50 each; \$25.00 doz.

Scotch Pine—A large and handsome evergreen of great hardiness and rapid growth. Branches are pendulous, giving tree pyramidal outline. Foliage of a twisted, bluish green, two or three inches, with cones reddish brown. Will thrive even on the poorest soils. Very ornamental.

Specimens, with ball: 3-4 ft., \$2.50 each; \$25.00 doz.

White Pine—Our great American Timber Pine, also a most beautiful tree, having a symmetrical pyramidal crown. One of few five-needle evergreens; soft, silvery, bluish green needles three to four inches long. Cones five to six inches; beautiful brown. Desirable for wind-breaks and hedge effects, as it will stand shearing well. The most valuable and adaptable of the Pines.

Specimens, with ball: 2-3 ft., \$1.00 each; \$10.00 doz.

RETINOSPORA—THE CYPRESSES

Retinospora Filifera (Thread-branched Cypress)—A remarkably handsome tree, pyramidal in form, with thread-like branches gracefully pendulous and elongated. Foliage a bright green and shimmering. This tree is highly recommended, and when established is very distinct and showy.

Heavy specimens, with ball: 1½-2 ft., \$2.00 each; \$20.00 doz.

Retinospora Pisifera—A splendid Japanese Evergreen of great hardiness and vigor. Foliage green, somewhat whitened beneath, and borne on drooping branches. A beautiful tree, recommended for every Evergreen collection.

Specimens, with ball, 1½-2 ft., \$1.50 each; \$15.00 doz.

Retinospora Squarrosa (Silver Cypress)—A low, densely-branched tree, with spreading, fern-like branches. Foliage is soft, dense, silvery blue. A remarkable specimen; most beautiful of all of the Chamaecyparis.

Specimens, with ball: 1½-2 ft., \$2.00 each; \$20.00 doz.

Retinospora Plumosa—A small tree of dense, soft green foliage. The branches are feathery and give plume appearance. Of conical but loosely-formed outline, which responds to pruning, and one of the most popular of all of the Cypresses.

Extra fine specimens, with ball: 2-3 ft., \$2.00 each; \$20.00 doz.

Retinospora Plumosa Aurea (Golden Plume Cypress)—A very hardy and beautiful tree, probably the most popular of all Cypresses. The foliage is of a feathery appearance, the terminal growth being golden yellow in color. Highly recommended.

Specimens, with ball: 1½-2 ft., \$3.00 each; \$30.00 doz.

THUYA—ARBOR VITAE

American Arbor Vitae—The beautiful native Arbor Vitae, attractive to use for hedges, or ornamentally alone. This is one of the most useful of the evergreens, thriving on a wide variety of soils and exposures. Will stand shearing well, and foliage becomes very compact.

Extra heavy plants, 2-3 ft., \$4.00 doz.

Golden Arbor Vitae—A dwarf, dense-growing variety, broadly pyramidal, with the terminal growth a beautiful golden yellow, which holds its color throughout the season.

Specimens, with ball: 2-3 ft., \$2.00 each; \$20.00 doz.

Pyramidal Arbor Vitae—A very compact and pyramidal tree, giving a formal effect similar to the Irish Juniper. Branches are short, densely clothed with bright green foliage.

Specimens, with ball, 2-3 ft., \$1.50 each; \$15.00 doz.

Siberian Arbor Vitae—A low-growing tree of exceptional hardiness. Foliage of beautiful, bluish green, with brownish tint, which makes it very distinct.

Specimens, with ball: 2-3 ft., \$2.00 each; \$20.00 doz.

Arbor Vitae

Scotch Pine

Golden Retinospora

SPECIMEN EVERGREENS

Umbrella Pine (Sciadopitys Verticillata)—A Japanese Pine of great beauty and hardiness. A very distinct and remarkable tree, with compact, ascending branches, forming a spreading, pyramidal head. Foliage in whorls of twenty to thirty stiff, heavy needles of a lustrous, deep green color, three to five inches long. It will succeed even in temperatures far below zero, which, added to the great beauty, makes it essential for every lawn and landscape.

Specimens, with ball: 2½-3 ft., \$5.00 each; \$50.00 doz.

American Holly—A handsome, broad-leaf Evergreen, familiar to all as Christmas Holly. Hardy from New England to Texas. The spiny, bright green leaves and bright scarlet

berries bring back Christmas memories and associations that will make this a beautiful asset to every home ground. Of easy culture, thriving in almost any soil.

Extra heavy specimens, with ball: 4-6 ft., \$5.00 each

Boxwoods—Very popular Evergreens, hardy as far north as Boston. They are grown in various shapes and sizes and are used extensively in tubs and jardiniere for terraces, porches and window boxes, as well as for winter decorations. They are effective, as specimen plants for the lawn, retaining their foliage throughout the winter.

Pyramids, beautiful specimens: 3-4 ft., \$3.50 each; \$6.00 pair

Special Opportunity to Obtain Varieties of Special Merit Early

Each year in our endeavor to give our customers the very best, we have introduced to our trade many varieties of trees and shrubs of real merit, the demand for which during the course of the season becomes heavy and soon exhausts our supply. To prove the sincerity of our interest in our customers, this year we are offering these specialties to you first of all, giving you the opportunity of having the stock reserved now, and shipped in the autumn at your convenience.

We trust you will avail yourself of this chance to secure some of these excellent varieties, we reserving them in your name, shipping at the proper time for fall planting. Our shipping season for the following varieties opens about October 1st.

Write today and let us book your order for the coming fall planting season.

Helleborus Niger—True Christmas Rose

It is with real pleasure that we have to offer this coming fall a large supply of extra fine Christmas Roses, each plant carefully grown, and a specimen. Few people realize the beauty and real pleasure that a bed of these hardy little plants will give, when, after a few mild days in December and January, the buds will burst forth into rich, creamy white flowers, two to three inches across. They are the only flower at this season, yielding with the utmost freedom, both for effect and for cut flowers.

The Christmas Rose makes a particularly rich setting against Evergreens, and the cheer of seeing a smother of magnificent white blossoms during the dreary months, repays the planter well.

This variety succeeds in any ordinary garden soil, but for best results, use a soil of rich loam and coarse sand, with top dressing of compost. A partially shaded situation is preferable, which adapts them to shrubbery border, but for cut flowers, large beds may be planted, the only precaution being not to disturb the plants when once established.

Fine, heavy two-year-old plants: 50c each; \$4.00 doz.

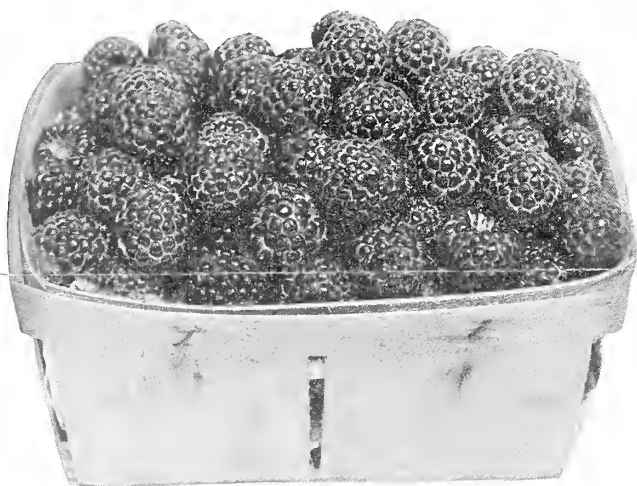

King of the Cliffs

INDEXED.

For Fancy Markets at Fancy Prices

This new Black Everbearing Raspberry is placed on the market after having been carefully tested for a period of years, and is now offered with the full assurance that it is the most profitable and desirable market variety yet known, because of its immense size, firmness and great productiveness.

In hardiness and productivity it is unexcelled by any other variety. In size the fruit is simply enormous, the berries running from 7/8" to 15/16" in diameter, and are of such handsome appearance that the fruit sells for from five to ten cents per quart more than other varieties. The color is glossy black and very attractive in appearance. The flavor is superb, being delicious for table use and splendid for canning. In respect to flavor it is one of the greatest acquisitions in years, surpassing all other black-caps.

In spite of its unusually large size, the fruit is possessed of great firmness, and is thus well adapted for standing long shipments.

The season of ripening varies, of course, in different latitudes, but at our nurseries delicious berries were picked from June to September, with the height of its season in July and August.

The bushes are entirely healthy and vigorous under all conditions, throwing up stout, stocky canes, well adapted for supporting their loads of large fruit. It has also shown itself remarkably free from pests and diseases, even when other varieties near by were affected badly.

King of the Cliffs was originated in North Dakota, where the mercury goes from fifteen to twenty-five below zero, and where it has stood severe cold for several years.

Strong, hardy, two-year-old transplants: \$2.00 doz.; \$15.00 per 100
(No bundles less than 12)
